-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because the description is not consonant with the embodiments presented in the claims of the instant application. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 7-9 and 13-33 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a bipolar transistor comprising an emitter, a base, a collector and conductive contacts [see pages 9-10 of applicant's specification], does not reasonably provide enablement for a bipolar transistor including a base region comprised of a n-type base region and a p-type base region; or an emitter and collector region comprised of a n-type emitter region, p-type emitter region, a n-type collector region and p-type collector region. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Please note that claims 7, 18, 31, 32 and 33 recite alternate embodiments including a device having at the same time a n-type emitter region, a p-type emitter region, a n-type collector region and a p-type

collector region; or a device having at the same time a n-type base region and a p-type base region which are not described in applicant's specification.

3. Claims 8-9, 13-17 and 19-30 are rejected due to their dependency on claims 7, 18, 31, 32 and 33.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claims 7-9 and 13-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 7, 18, 31, 32 and 33, the recitation of different combinations of devices having alternate materials present uncertainty or ambiguity with respect to the question of scope or clarity of the claims. The examiner suggests using a Markush group to present the claimed alternative expressions [see MPEP 2173.05(h)].

7. Regarding claim 7, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

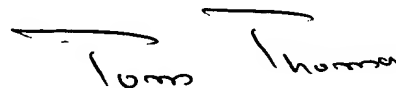

8. Claims 8-9, 13-17 and 19-30 are rejected due to their dependency on claims 7, 18, 31, 32 and 33.
